

The Crunch for children aged 4 to 11

Each kit is packed full of scientific equipment, lesson notes and practical activities for every age group to help you and your students explore the links between our food, our health and our planet. From finding out what a chocolate biscuit and an orangutan have in common, to encoding green fluorescent protein, the kits have everything you need to use practical science to explore some of the most important problems we face today.

There'll also be loads of online resources to help you bring The Crunch to your students, with videos, cross-curricular resources and specially commissioned plays.

Watch how The Crunch activities have been used by teachers, students, young people and The Crunch Ambassadors. Discover what you can do with the free resources both inside and outside of the classroom.

For more inspiration and ideas go to <https://thecrunch.wellcome.ac.uk/the-crunch>

All schools in Wales who request a STEM Ambassador can borrow the Crunch Box from their local STEM Ambassador Hub – See-Science – free of charge. Contact enquiries@see-science.co.uk.
